

Corrigendum

Louizidou P, Thessalou-Legaki M and Zenetos A (2007) First record of the Red Sea immigrant *Chrysallida fischeri* (Hornung and Mermod, 1925) (Gastropoda: Pyramidellidae) from Greek waters. *Aquatic Invasions* 2 (2): 95-98

In this publication the species depicted and described by the authors as a first record for Greek waters of *Chrysallida fischeri* (Hornung and Mermod, 1925) was identified as *Odostomella bicincta* (Tiberi, 1868) by J. J. van Aartsen – a species native to the Mediterranean. The error was probably caused by the fact that the figure in the CIESM Atlas (Zenetos et al. 2004, p. 136) is actually another native species - *Odostomella doliolum* (Philippi, 1844) – already recorded from Greek waters (Antoniadou et al. 2005).

Odostomella bicincta differs from *O. doliolum* in having a single colored band on the middle of the whorls and only two on the last whorl, whereas the latter species shows two and three bands respectively. *Chrysallida fischeri* differs from the *Odostomella* spp. by its uniform white color, slender shell, axial ribs slimmer than interval between ribs, spiral ribs well-developed, about 10 on the penultimate whorl and about 20 on the bodywhorl (Figure 1) (van Aartsen and Carrozza 1979, figs 1 A,B; Barash and Danin 1992, fig. 187; Mazziotti et al. 2002: fig. 1-5; NON Zenetos et al. 2004: 136 = *O. doliolum*).

We are grateful to C. Bogi and H. Mienis for bringing the error to our attention and also to S. Gofas and J.J. Van Aartsen for comments.
